

# An Introduction to Adobe Lightroom

A Short Photography Course with Julian Buchwald

## Course Description

Adobe Lightroom is arguably the most useful piece of software available to the digital photographer. This course is an introduction to this software and by the end of the course you should be able to:

- understand the layout of the software and its modules.
- create catalogues for all of your needs.
- import and back-up your images.
- understand and use collections.
- perform basic image editing.
- export and save your images.
- do much, much more than you could before the course.

## Is This Course for You?

This course is primarily aimed at two groups of people. Those who want to learn more about Lightroom before purchasing and those who need help getting Lightroom up and running on their own. It will also be of use to those of you who are up and running but not sure they are getting the most out of Lightroom. This course will not be an in-depth program in image editing - that one is coming up in a future course.

## Registration

You must register for this course to be able to attend. Either by emailing me at the address below or by phone at (780) 723-2338

## Cost

Here's a twist...

...The fee for this course is a donation of at least \$75.00 to my MS Bike Ride fundraiser. This means that not only do you get the class but you also get a tax receipt for the donation! A special thank you to Karen and Sharon at Century 21 for donating their boardroom for this course.

## What To Bring

### Time and Location

Saturday, April 23rd, 2016  
9am - 12noon

Century 21 Boardroom  
5016 - 4 Avenue

A laptop (either Windows or Mac) with Adobe Lightroom installed would be useful but not absolutely necessary. If you do not have Lightroom and don't want to purchase it until you know more, you can install a trial version from adobe.com. A memory card with some of your camera's images on it (not too many as this will slow you down) and a way to read it with your laptop.

For more information and to register please email me at [jbuchw@telus.net](mailto:jbuchw@telus.net)
