

The **VERY** Basics of Digital Cameras

A Short Photography Course with Julian Buchwald

Course Description

This course will be an introduction to digital cameras. We will cover digital camera/photography terminology. We will cover digital camera components, controls, memory cards, batteries, accessories. And then will cover the operation of digital cameras to help you get the most out of them. By the end of this course you should be able to shed your fears of your digital camera and take control of your photographic destiny. Ok, that was just a little over the top but by the end of this session you should be able to:

- understand the basic terms used in digital photography.
- identify the different parts of a digital camera.
- manipulate all of the basic controls of your camera.
- hold your own in a lively discussion with other photo geeks or at least be able to smile and nod so it looks like you know what they are talking about.
- understand your camera like you never did before and make the best of it to create the photographs you would like to see.

Is This Course for You?

This course is suitable for photographers with any level of photography experience with limited (or no) knowledge of digital cameras. It's for you if you want to know how to go about selecting a digital camera. It's for you if you want to learn how to operate the digital camera that you already own.

Registration

You must register for this course to be able to attend. Either by emailing me at the address below or by phoning me at (780) 723-2338.

Cost

Here's a twist...

...The fee for this course is a donation of at least \$75.00 to my MS Bike Ride fundraiser. This means that not only do you get the class but you also get a tax receipt for the donation! A special thank you to Karen and Sharon at Century 21 for donating their boardroom for this course.

Time and Location

Saturday, April 16th, 2016
9am - 12noon

Century 21 Boardroom
5016 - 4 Avenue

What To Bring

It would be beneficial (but not necessary) to bring your digital camera with you to this course. The instruction manual would also be useful. If you are attending this course to help you decide what camera to purchase, I will have a variety of cameras available to look at.
